

# ELECTRIC WALKIE & RIDER Weigh Scales

## Save Time, Weigh-On-The-Move

Weigh Point's **Weigh-On-The-Move** electric Walkie or Rider scale saves you time with its multifunction capabilities. Now you can weigh skids right on the forks, avoiding transporting goods to a floor scale.

You will find rugged weight sensors built directly into robust sleek forks that can quickly change your walkie or rider into a time saving accurate **Weigh-On-The-Move** system.

The system will provide you with piece counting information from entire totes of product, simply by entering a sample weight. All of your weighing and counting needs are controlled by a single instrument. Information is retained during power interruptions.

Features include:

- ⇒ Interface to printers and computers logging your weight data for further reference
- ⇒ Simple operation, turn on, lift weight and observe reading
- ⇒ Reliable, years of operation without the need for re-calibration
- ⇒ Specially manufactured to maintain low profile forks, for easy clearance.

## ACCURACY

- ⇒ 99.8% or better accuracy
- ⇒ Years of operation without the need to recalibrate. (Certification can be performed by your local scale company)
- ⇒ Security code and break seal are required to activate calibration and settings, thus preventing tampering

## ADVANTAGES

- ⇒ Time is money! Save time by cutting out unnecessary trips to a floor scale
- ⇒ Retains integrity of Walkie or Rider, scale does not need to be removed for non-weighing operations
- ⇒ Easy to operate. No extensive training required
- ⇒ Serviceability – The system can be serviced in-house by your maintenance department. Weigh Point can provide training
- ⇒ The system components are familiar with local scale service companies. You choose your preferred service firm and we'll provide the information required

***Weigh Point has been providing innovative weigh scales for 30 years.***

In addition to our **Weigh-On-The-Move** products we also manufacture loadcells and weigh scale systems for mining, agricultural, pulp and paper, food processing and many other industries.
