

Affordable Weighing Solutions

The Loafer™ Scale for Lift Trucks

PATENT PENDING

Weigh Covers Slip right on standard forks

DIMENSIONS

T add 0.625" to forks existing thickness

L add .50" to forks existing length

W add 0.875" to forks existing width

Versatility– Slip on the Loafer™ Fork-Scale and weigh at 99.5% or better accuracy. Introducing Weigh Point's new slip-on-scale that slides quickly and easily turning your lift truck into a mobile weighing machine! Simply slide the Loafer scale into your forks, secure by locking the heel pin in place, mount indicator in the cab and you're ready to weigh!

Installation of Loafer™ - The scale is provided with both a permanent mount kit as well as a quick install kit ideal for multi-truck use or infrequent weighing.

Efficiency- This system is designed for versatility. The quick release pin installs or removes the system from your truck.

Portability– system can be removed when not required to weigh.

Accuracy– 99.5% of scale capacity guaranteed.

The standard graduation for the Loafer system is 5 lbs. A 5000 lb. capacity rating is for systems incorporating ITA Class II forks.

+/- 1lb. Graduation available upon request. Check factory for costs.

Cost- Surprisingly economic.

Capacity– All Loafer™ systems exceed the rated lift truck capacity.

Safety– Unlike most scales this system maintains the truck's rated capacity.

Calibration– The system is precalibrated, however custom settings are keypad entered if factory settings need to be changed.

Wire Harness– 2 choices are supplied w/ scale.
Permanent Reeving System
Heavy Duty Coil Cable

Durability– Combine the rugged metal plate covers with high capacity weight sensors makes endurance guaranteed. Weigh Point's time proven digital display performs successfully.

Instrumentation– The standard LED display provides push button zero, lb/kg selection and accumulation, a great feature for loading/unloading multiple packages. Includes data output port for printer or computer. **If piece counting or digital tare is required display can be upgraded to a model capable of requirements.**

Features:

- **Compares with lift truck scales costing twice as much**
- **5 minutes to install**
- **99.5% accurate or better – super accuracy if necessary at extra cost**
- **Uses standard forks (4"x1-1/2"x 36x42 or 48")**
- **No modifications (ideal for rented or leased trucks)**
- **Made in Canada**
